

### MULTI-CONFIGURABLE FLOATING WALKWAY FOR INDUSTRIAL MARINE AND MINING OPERATIONS

**Xrosswater** produce a unique industrial strength, pre-fabricated, bulk shippable floating structure, designed for use in mining, dredging, dewatering, tailing dam, reservoir and other industrial water applications.

**PIVOT Walkway**

**Xrosswater Web**

**Marafiq Power & Desalination Plant Saudi Arabia** required Xrosswater to design, build and supply a 140m walkway that can work on fast moving water on the edge of a weir. The walkway is to allow access to rehabilitate the concrete piles. The weir supply is from 8 massive sea water pumps and is 90 meter wide, 5 meter deep and flows at approx. 2mps over the wall

**Northern British Columbia, Canada.** 300m walkway and a 6.5m deep x 300m long vertical barrier to prevent the tailings sediment from entering the pumps. The walkway with deicer support the barrier and assists in lifting the barrier through the tailings as the water level rises.
